Continuous Medical Education

ANIC Mission Statement

The Advanced NeuroInterventional Course invites trained staff to join this opportunity to update their precious knowledge in the NeuroInterventional field. The ANIC2016 Barcelona program strives for best quality while concentrating on neurovascular pathologies. For a selection of neurovascular diseases, CME at 8th ANIC2106 offers a unique access to the evolving disease understanding, to diagnostic methods, to minimally invasive treatment options, and to alternatives.
To each topic, recognized lecturers are presenting a magistral lecture to all, followed by group workshops to illustrate further, deepen the matter and answer questions to the topic. Personal case presentation for discussion are welcome. Individual hands-on workshops are available.

UEMS / EACCME Credit

As in previous years, an application has been made to the **UEMS / EACCME** for CME accreditation of this event.
